## **URGENT: Three-Lane Closure of I-495 at Route 123 in Tysons Corner to Begin Wednesday, Feb. 16**

Construction of the aerial bridges that will carry tracks for the Dulles Corridor Metrorail Project over the Capital Beltway (I-495) at Route 123 will begin Wednesday night, Feb. 16. This work will require closing three lanes of northbound I-495 overnights from 11 p.m. to 5 a.m.

These closings also will take place Thursday night, Feb. 17 and Friday night, Feb. 18, and will continue nightly Sundays through Fridays for the next five weeks.

Northbound thru traffic will be allowed to use the single open lane. Drivers should expect significant delays each night.

In addition, the exit ramps from northbound I-495 to both northbound and southbound Route 123 will be closed. To access Route 123 from the Beltway, drivers will be directed to detour by continuing on the Beltway north, exiting Georgetown Pike (Route 193), turning around at Georgetown Pike, then entering the southbound Beltway. Drivers will be able to exit to both directions of Route 123 from the southbound Beltway.

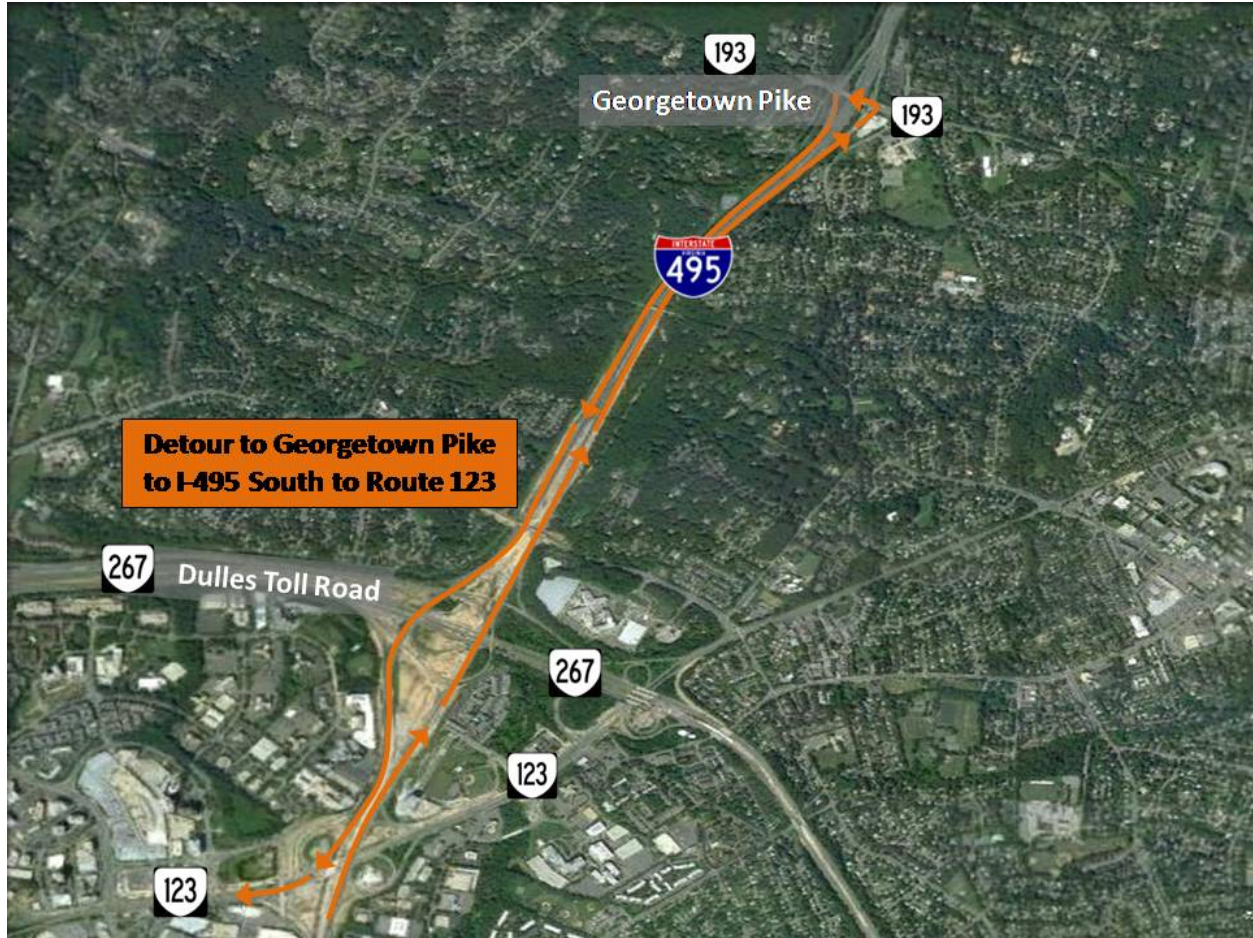

Crews will be using a large horizontal crane (also known as a truss) to build the bridges over I-495. Traffic cannot travel under active bridge construction for safety reasons.

The rail project previously had announced that the work at the Beltway crossing would begin Sunday night, Feb. 13.

Police will be onsite. Motorists are urged to use extreme caution, and pay attention to signage and detours for exit ramps. All work is weather-dependent and subject to change.
